Improving Transit in the Bay Area: Principles of Effective Systems

Featuring transportation expert

Alan Hoffman

Founding Principal of The Mission Group, San Diego, CA

Too many transit planning decisions are driven not by sound principles but by wishful thinking, modal fetishes, and the availability of corridors or rights-of-way. What are the principles that should guide transit planning? How can transit systems truly build ridership? What is the true potential of "transit-oriented development?" And why don't many transit planning professionals understand and invoke these principles?
