Notes:

Trip generation rates from ITE's *Trip Generation*, 6th Edition, unless otherwise noted.

¹ Trip generation estimates reduced by 50-percent to account for pass-by trips. The pass-by reduction is consistent with what is published in ITE's *Trip Generation*.

² Trip generation estimates are based on the Oracle Daycare facility TIA by Fehr & Peers conducted in November 2001.

³ In July of 2001 (when counts were conducted on Seaport Boulevard), Pacific Shores had 270,000 s.f. of office space occupied. These trip generation numbers are estimates from the original Pacific Shores TIA (Fehr & Peers Associates) that have been factored down to account for the buildings that were occupied when the counts were conducted.

⁴ Trip generation estimates from Fehr & Peers Associates preliminary trip generation estimate for this proposed project (March 2002).

⁶ Trip generation estimates from Westpoint Marina TIA conducted by RKH (February 2001).

⁷ According to the project sponsor, the building was 60-percent occupied in January 2002. Trip generation presented in the TIA for this development (Fehr & Peers Associates, June 2000) were factored to account for the occupancy. Total building size is 96,000 s.f.

⁸ Mixed-use reduction applied based on information presented in the TIA conducted for the development (Fehr & Peers Associates, July 2000).

⁹ Trip generation estimates from surveys conducted at the Orinda Starbucks Coffee location by Fehr & Peers Associates (November 2001). A pass-by reduction of 30-percent was applied to the observed rates.

¹⁰ Trip estimates from TIA conducted for this project by RKH. All new project trips are truck trips. Therefore, a passenger car equivalent of 2.0 was applied to the trip estimates.

¹¹ This site is expected to be re-developed in the future, although a definitive project description has not been determined. Discussions with City staff have indicated that the most probable development will be either 600 apartment units or a car dealership.

¹² Based on trip generation estimates prepared by Fehr & Peers Associates for the Kaiser MP EIR (January 2003).

¹³ Land use assumptions assume worst case build out of the site. Hotel rates based on ITE rates and is in trips per occupied room. For the trip generation estimates, a 95-percent occupancy is assumed.

¹⁴ Preliminary trip generation estimates prepared by Fehr & Peers Associates (December 2002).
