## 19. MITIGATION MONITORING

---

This EIR chapter describes a recommended monitoring program for implementation of the mitigation measures identified in this EIR, and describes relationships between various anticipated monitoring needs and responsible monitoring agencies.

### 19.1 MONITORING REQUIREMENTS

CEQA section 21081.6 of the Public Resources Code requires all public agencies to adopt reporting or monitoring programs when they approve projects subject to environmental impact reports or mitigated negative declarations.

A mitigation monitoring program would be required for implementation subsequent to certification of the Bayside Gardens Project EIR. Most of the environmental mitigation measures that have been recommended in this EIR would be subject to effective monitoring through normal Redwood City Strategic General Plan, zoning, subdivision, Planned Development Permit, grading, site and design (architectural) review, and building permit approval procedures, as well as during associated plan check and field inspection procedures. However, to satisfy CEQA section 21081.6, a documented record of implementation will be necessary.

### 19.2 MONITORING CHECKLIST FORMAT

While actual formulation of a specific mitigation monitoring program should not be completed unless and until this EIR is certified, the framework to be followed in finalizing the monitoring program subsequent to project approval can be determined on a preliminary basis at this EIR stage.

The attached checklist (Table 19.1) includes spaces for identifying: (1) each mitigation measure included in the EIR; (2) the party responsible for implementing that mitigation measure and any related requirements with respect to the timing of implementation; and (3) the party responsible for performing mitigation monitoring plus information on the type and required timing implications of the monitoring procedures. These checklist categories are discussed in more detail below.

### **19.1.1 Identified Impact**

This column would include each identified significant adverse impact as it is described in the EIR summary table (Table 2.1 in EIR chapter 2).

### **19.1.2 Mitigation Measure (Performance Criteria)**

This column would include each mitigation measure as it is described in the EIR summary table (Table 2.1 in EIR section 2). The description could be supplemented by any applicable performance criteria (i.e., the measure by which the success of the mitigation can be gauged) associated with each measure.

### **19.1.3 Monitoring**

This column would describe (1) the "implementation entity" responsible for carrying out each mitigation measure (e.g., a City department, another public agency); (2) the "type of monitoring action" required (e.g., condition of project approval, established plan check and/or inspection procedures or, if these are not sufficient, specialized monitoring procedures); (3) specific implementation timing requirements (e.g., at the completion of a particular development review or construction phase, prior to occupancy, or when some specific threshold is reached); and (4) the "monitoring and verification entity" responsible for performing the monitoring of each mitigation (e.g., a City department, another public agency, or some other entity).

### **19.1.4 Verification**

The verification column would provide a space for the signature and date of the "monitoring and verification" entity when a monitoring milestone is reached.
