Bayshore Technology Park Construction Update

Island Drive & Marine Parkway

The Recycled Water Project is continuing its next phase in the Redwood Shores area with trenching in the streets and installation of pipeline in the area of Island Drive and Marine Parkway near the Bayshore Technology Park.

Trenching is expected to start on Friday, Oct. 17. Construction will commence at the intersection of Island Drive and Marine Parkway and proceed west along Island Drive to Bridge Parkway. Construction hours are from 9 AM and 4:30 PM, Monday to Friday. This segment is expected to be completed in approximately three weeks.

Bridge Parkway and Marine Parkway

By mid-November, the contractor is expected to complete the final portion of this segment with trenching and pipeline installation on Bridge Parkway near the intersection of Marine Parkway in the area of the Indian Creek Apartments.

Traffic will be subject to control by flaggers and at times restricted to one lane during construction. Please watch for traffic flaggers and follow their directions and be aware of barricades in the construction zones. Pedestrians and bicyclists should exercise caution. If possible, motorists are advised to avoid the construction areas.

The contractor will strive to minimize impacts during construction, but there

may be construction noise, access limitations, detours, parking limitations on streets and other inconveniences. Please contact our offices if you have any questions regarding these activities at (650) 743-5759
