

# PUBLIC NOTICE

## Red Morton Park, Magical Bridge Playground ELECTRICAL SERVICES & PARKING LOT

National Guard Armory Building Parking Lot Improvements Project  
January 2018 – April 2018  
Silicon Valley Paving, Inc.

### **Upcoming Construction**

The playground renovation at Red Morton Park has begun!

The first step is to relocate the existing electrical utility boxes and underground the overhead cables. This requires a long trench across the west side of the park. The pathways are currently open, however, the project will require temporary closure over the next two months.

The next step is the parking lot near Valota Road; this phase will include paving and landscaping the existing dirt lot, and to install all the associated storm water catchment infrastructure. The contractor will begin the parking lot construction in January 2018 and, contingent upon weather, will be completed in 80 days. Additional improvements to the driveway entrance and drop off area will come in Summer 2018.

### **Project Area**

The overall project area will include the parking lot near Valota Road, the playground and picnic area, and the sports field viewing area near Griffin Field. The project also includes improvements to the driveway entrance into the park and a new crosswalk over Valota Road.

### **Project Objective**

Build a Magical Bridge Playground that is accessible to everyone to enjoy. Redwood City has partnered with the Magical Bridge Foundation (Palo Alto) to build an innovative and inclusive playground in Red Morton Park. For more information on Redwood City Magical Bridge Playground, visit
