

Plant it Beautiful. Keep it Green.

Recommended Plant List for Recycled Water Irrigation in the Redwood Shores Area

Converting to recycled water use does not generally require that you make radical changes to your landscaping. The vast majority of plants do fine with recycled water. The following plant list does not represent all the plants that are recycled-water tolerant. If you have plants in your landscape that are not included in this list, it does not mean they are incompatible with recycled water. The Redwood City Water Conservation and Recycling Program encourages its customers to try other plants as well.
