The City of Redwood City, in cooperation with the California Department of Transportation and the San Mateo County Transportation Authority, is proposing to reconstruct the Route 101/SR 84 Woodside Road interchange in the City of Redwood City in San Mateo County. The purpose of the project is to relieve existing and future traffic congestion, and to improve traffic safety and vehicular access to and from Route 101 and State Route 84. The project goals include improving highway operations, reducing associated congestion on Redwood City streets, removing barriers to non-motorized travel, and minimizing impacts on nearby businesses. This project proposes to modify the on- and off-ramp configuration at the interchange and the adjacent local intersections to improve traffic flow, increase safety, and better accommodate pedestrian and bicycle access across Route 101.

**Project Goals**

- Alleviating existing and projected peak hour traffic congestion at the Route 101 / SR 84 (Woodside Road) Interchange,
- Enhancing mobility and safety for all users and modes, and
- Improving traffic operations at the intersections of Seaport Boulevard/ Blomquist Street - East Bayshore, Woodside Road / Veterans Boulevard, Woodside Road / Broadway Avenue, and Woodside Road / Bay Road.

**Project Approval & Environmental Document Phase**

Preliminary Engineering Studies ↔ Community Outreach ↔ Environmental Studies

Extensive Community Outreach is an integral part of the process. Please see the back of this sheet for the Community Outreach Schedule.
