FEBRUARY 2018 UPDATE

February 2018 UPDATE
The Neighborhood Street Enhancement Plan was approved by Redwood City Council on January 22, 2018.

We will present an overview of the Plan to the North Fair Oaks Council on February 22, 2018. This will be followed by a presentation to the County Board of Supervisors for Plan approval this spring.

After approval of The Plan by the County Board of Supervisors, the project will move forward to final design this spring and summer.

Additionally, this spring we will be conducting a survey of residents of Scott Avenue, Flynn Avenue, Greenwood and Meadow Lanes to get input and direction on the one-way street(s) pilot project.

Most of the high priority projects improve conditions for pedestrians, calm traffic, or make the streets more attractive. Example projects include intersection bulb outs, new streets lights, lane narrowing, high visibility crosswalks, public art and updates LED Flashing pedestrian warning signs.

The full implementation Plan can be found at the links below.
