NOTES:

1. Contractor shall verify location & elevation of all utility boxes with City Engineer in cobble areas.
2. Contractor shall reset boxes as required.
3. Mortar – 1 part Portland Cement, 3 parts well graded clean sand.
4. Do not use mortar mixed longer than 2 hours.
5. Install cobbles as detailed with butt joint & min. exposure of mortar. Keep cobbles clean & exercise care to keep mortar off exposed cobble faces & curb. If cleaning is necessary use only wood scraps or stiff brushes, no metal.
6. All cobbles must lay flat.
