NOTES:
1. Contractor shall not bring up any cathodic protection wires in valve box.
2. The anode shall weigh 30/32 pounds zinc/magnesium for pipe diameters less than 10 inches. The anode shall weigh 60/64 pounds zinc/magnesium for pipe diameters equal to and greater than 10 inches up to 16 inches. For special cases, the sizes and types of anodes shall be determined by the City Engineer.
3. Use zinc anodes on areas east of El Camino Real and magnesium anodes on areas west of El Camino Real.
4. Install thrust blocks and joint restraints to support tee, per plans or as directed by the City Engineer.
5. In lieu of concrete thrust block, joint restraint devices can be used. For restraint lengths at tee, see Std. Details W-20A thru W-20C.

NOT TO SCALE
